	weight	1900gr.
	series	STREET
	category	MOTORBIKE
	model type	OTHER
	brand	HONDA
	model year	1968
	availability	sold out

description: The Honda CB 750 was presented in 1968 and became a sales success in the USA immediately after its market introduction in 1969. With an engine capacity of 736 ccm, 67 HP @ 8,000 rpm and a maximum speed of almost 200 kph, the machine was revolutionary at its time. It was the first production motorbike fitted with a front disc brake which guaranteed safe braking with ultimate deceleration. The clearly arranged twin instruments were styling elements of this model and have been kept on Honda road motorbikes until today. The CB 750 was designed for sportive driving. Quick acceleration and safe handling even at high speeds were its major qualities. By the time sales started in Germany at the beginning of 1970, the allocation for the German market was sold out already. The list price was DM 6,495.00.

Model Features:

- * original metal chain
- * movable seat
- * spring loaded movable kick starter
- * spring loaded movable accelerator handle

- * movable clutch- abd brake-levers
- * movable brake pedal
